Laboratory and Clinical Issues Affecting the Measurement and Reporting of Cardiac Troponin
A Guide for Clinical Laboratories

ISBN No. 978-0-646-56953-6
© Copyright 2012 The Australasian Association of Clinical Biochemists Inc.

A Monograph on Cardiac Troponin, produced by the AACB Scientific and Regulatory Affairs Committee in collaboration with the AACB Publications team on behalf of the AACB Troponin Working Party.

Editorial Team: Jill Tate, Roger Johnson, Allan Jaffe, Mauro Panteghini.

This volume provides in-depth coverage of clinical and analytical aspects of troponin measurement. It discusses use and interpretation of both contemporary and highly sensitive assays from the viewpoints of the cardiologist, emergency physician and general physician, and clinical use of troponin at point-of-care. The laboratory perspective covers quality requirements, verification of performance characteristics and introduction of highly sensitive assays into routine use. It is designed as a practical book with worked examples. As such, it should appeal to both clinicians and laboratory workers faced with using troponin on an everyday basis.

Contents

Introduction
1. An Overview of Clinical and Laboratory Issues Affecting the Laboratory Measurement and Reporting of Troponin – Jillian R Tate, Mauro Panteghini, Louise Cullen, Allan S Jaffe

Clinical Issues
2. Clinical Implications of Troponin Elevation – Hans G Schneider
3. How Cardiologists Should Use Troponin for the Diagnosis of Acute Myocardial Infarction – Harvey D White, Allan S Jaffe
4. The Challenges of Sensitive and Highly Sensitive Troponin Assay Use in the Emergency Department – the Emergency Physician’s Perspective – Martin Than, Louise Cullen
5. How Troponin is Used in General Medicine – Rosy Tirimacco, Josh Martin, Hans G Schneider, Philip Tideman
6. How Troponin is Used at the Point of Care – Philip Tideman, Rosy Tirimacco
7. The Clinical Evidence for ‘Delta Troponin’ Use – Louise Cullen, Allan S Jaffe

Laboratory Issues
8. Quality Requirements for Troponin Assays – an Overview – Mauro Panteghini
9. Pre-analytical Factors Affecting Troponin Measurement – Graham RD Jones, Mauro Panteghini
10. Verification of the Analytical Characteristics of Troponin Assays – in the Laboratory – A How To Guide – Jillian R Tate, Mauro Panteghini, Gus Koerbin, Peter E Hickman, Hans G Schneider, Allan S Jaffe
11. PoCT Assays for Troponin – Rosy Tirimacco, Philip Tideman, Paul Simpson
12. The Reporting and Interpretation of Troponin Results – Laboratory and Clinical Aspects – Louise Cullen, Martin Than, Harvey D White, Allan S Jaffe
13. Introducing Highly Sensitive Troponin into Routine Use – A Worked Example – Graham RD Jones, Andrew Finckh, Stephanie Wilson
