

**Katie** (BSc Med Lab Sci)  
Recruitment Consultant

## Biochemistry Supervising Scientist

In your role as Supervising Scientist Chemistry, you will be the Second-In-Charge working closely with the Head of Department and Supervising Chemical Pathologist to provide routine core Biochemistry services.

You will be assisting with the day-to-day operation across the core Chemistry laboratory and assisting the supervision and management of 20 staff.

### The Role

- QC Review and QAP analysis
- Interpreting clinical results, identifying artificial results
- Communicating patient results with the requesting clinicians and clients
- Supervising the team to success with a strong emphasis on mentoring and sharing your technical knowledge, modelling a positive attitude, positive communication, bonding and engagement
- Oversee staff rostering, Equipment Maintenance and Reagent and Consumable Supply
- Change Management as required to keep up with emerging technologies relevant to chemistry and workflow
- Test valuations and verifications as per NATA guidelines
- Development for Head of Department role within the company

### About You

- Tertiary Qualifications in Medical Science, Biochemistry or equivalent
- At least 5 years post graduate industry experience, with a strong bias towards clinical biochemistry and diagnostic Pathology
- Excellent analytical and problem-solving skills
- Strong verbal and written communication skills.
- Motivated and looking to progress career towards Laboratory Leadership

Training will be provided however the suitable applicant needs to have experienced Biochemistry Technical knowledge.

### The Benefits

- Attractive salary package
- Monday - Friday dayshifts (flexible if the applicant would like to participate in weekend and evening shifts)
- Work for a company that embraces diversity and equal opportunity.
- Professional Development supported- This client would support time off to attend the RCPA AACB Chemical Pathology Course
